

## The Probability That a Numerical, Analysis Problem Is Difficult (Classic Reprint) (Paperback)

Filesize: 6.26 MB

### Reviews

*Basically no terms to explain. I have read and so i am certain that i will gonna go through once again once more in the future. I realized this ebook from my dad and i encouraged this book to discover.*

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from The Probability That a Numerical, Analysis Problem Is Difficult Numerous problems in numerical analysis, including matrix inversion, eigenvalue calculations and polynomial zero finding, share the following property: the difficulty of solving a given problem is large when the distance from that problem to the nearest ill-posed one is small. For example, the closer a matrix is to the set of noninvertible matrices, the larger its condition number with respect to inversion. We show that the sets of ill-posed problems for matrix inversion, eigenproblems, and polynomial zero finding all have a common algebraic and geometric structure which lets us compute the probability distribution of the distance from a random problem to the set. From this probability distribution we derive, for example, the distribution of the condition number of a random matrix. We examine the relevance of this theory to the analysis and construction of numerical algorithms destined to be run in finite precision arithmetic. To investigate the probability that a numerical analysis problem is difficult, we need to do three things: 1) Choose a measure of difficulty, 2) Choose a probability distribution on the set of problems, 3) Compute the distribution of the measure of difficulty induced by the distribution on the set of problems. The measure of difficulty we shall use in this paper is the condition number, which measures the sensitivity of the solution to small changes in the problem. For the problems we consider in this paper (matrix inversion, polynomial zero finding and eigenvalue calculation), there are well known condition numbers in the literature of which we shall use slightly modified versions to be discussed more fully later. The condition number is an...
