By Samuel Alsop

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 72 pages. Dimensions: 9.7in. x 7.4in. x 0.1in.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1865 Excerpt: . . . the fifth column are found by multiplying the corresponding numbers in columns 3 and 4. They therefore are the double areas of the several trapezoids and triangles. Ex. 2. Required to calculate the content and make plats from the following field-notes: --257. Offsets. In what precedes, the sides have been supposed to be right lines. Thia is ordinarily the case except when the tract bounds on a stream. It then, if the stream is not navigable, generally takes in half the bed. Lands bounding on tide-water go to low-water mark. In all such cases the area and configuration of the boundary are most readily determined by offsets. A base is run near the crooked boundary, and perpendicular offsets are taken to the line, whether it be the middle of the stream or low-water mark. If the positions of these offsets are judiciously chosen, so that the...
