# Introduction to Stokes Structures

By Claude Sabbah

Springer-Verlag GmbH Okt 2012, 2012. Taschenbuch. Book Condition: Neu. 243x155x20 mm. Neuware - This research monograph provides a geometric description of holonomic differential systems in one or more variables. Stokes matrices form the extended monodromy data for a linear differential equation of one complex variable near an irregular singular point. The present volume presents the approach in terms of Stokes filtrations. For linear differential equations on a Riemann surface, it also develops the related notion of a Stokes-perverse sheaf. This point of view is generalized to holonomic systems of linear differential equations in the complex domain, and a general Riemann-Hilbert correspondence is proved for vector bundles with meromorphic connections on a complex manifold. Applications to the distributions solutions to such systems are also discussed, and various operations on Stokes-filtered local systems are analyzed. 249 pp. Englisch.

## Reviews

*The ebook is fantastic and great. I really could comprehend every thing out of this published e publication. You can expect to like the way the blogger write this publication.*

-- **Precious Farrell**

*This book may be worth buying. I have read and i am confident that i am going to planning to go through once more once again in the future. Its been written in an exceptionally easy way and it is simply soon after i finished reading this publication in which actually altered me, modify the way i believe.*
